Stony Plain's Big Sports Day On Monday Next

The Town and District's One
Big Day to Be Celebrated
in a Right Royal
Manner.

The booming of the 10 a.m.
gun on the morning of Monday
next will mark the opening of
Stony Plain's big annual cele-
bration of Dominion Day. At

that hour the first of the ball
games in the tournament series
will commence. Balltossers
on teams from near and far
will compete for the prizes of
cash.

There is sure to be a keen in-
terest taken in the matches
arranged with the many girls'
basketball teams, as the rivalry
between these is well
known. The Brightbank girls,
winners of many contests, will
be present, and are sure to be
at their best.

Of special interest to farm-
ers is the revival of the good
oldtime contests, such as the
team pulling matches that have
been arranged for; another
will be the class for the best
general purpose team on the
grounds, for which a special
prize will be awarded.

Local motorists are taking a
keen interest in the slow-car
race billed to be run about 4
o'clock, and bets have already
been made as to whom the
winner will be.

Oldtimers of town and district
will participate in the
big re-union to take place in
afternoon. Addresses will be
delivered by several promi-
nent gentlemen.

There will be no lack of
something to interest every-
one during the entire proceed-
ings, as the Sports Committee
has arranged to have several
events run concurrently. Good
prizes are assured for the win-
ners of the contests.

There's to be a dance in the
evening in Kelly's Hall, with
an exceptionally good orches-
tra

Heard At the Gas. Pumps.

Garage Mechanic—Hey, boss, your
doctor is out here with a flat tire
and a broken spark plug, and wants
to know how much the charge will
be.

Boss—Diagnose his trouble as fat-
igued motion and a case of ignition
deficiency. Change the tire, put in a
new plug, and charge him around five
bucks.

De-Bunking Mysteries

One of the traits which keeps humanity young and adds a zest to the mere act of living, is man's capacity for wonder, his somewhat naive curiosity in freaks, and his enthusiasm for the unusual or phenomenal in nature. It can scarcely be called a characteristic distinguishing homo sapiens from the beasts of the field or fieside, for the domestic cat or dog (to mention species coming within the range of everyone's experience) shows a strangely similar capacity when confronted with something strange in its immediate environment. By test of paw or teeth, it ascertains whether the new experience is good or bad; just as man will, by more complicated experiments it is true, attempt to rob the mysterious of its mystery.

There is a reason, of course, for this outbreak. Strange, very aquatic monsters have been sighted in diverse corners of the globe. Reports concerning them have been considered of sufficient interest to warrant publication all over the world. A British Columbia lake provided the first thrill of the present series—a thrill which became familiar in everyone's mouth under the euphonious title "Ogopogo". The ocean, not to be outdone by a mere inland lake, immediately produced another of these strange denizens of remote waters, which, christened "Cachocronaut", is for the credit of its habitat in Vancouver Island, quickly acquired a popular name. As "Cady" it attracted as much attention from reporters and the general public, during its brief occupancy of the spotlight, as have the Quebec guntuplets of more recent and certain origin.

France next came to bat with a claim on behalf of its particular pet, seen as through a glass darkly, but acclaimed a monster, a freak, a lusus nature, or a throwback. The world was agog with speculation as to what manner of things these visioned creatures were. The sea serpent of myth and anecdote never attained such repute as the new genus. The sea serpent was too easily explained. It was either a snake which had strayed from its forest lair to essay adventure on the briny deep, or it was the garbled and twisted trunk of a fair sized sapling which ocean currents induced with similitude of life.

This was easily explained. Its discovery, whether in British Columbia, France, Scotland, Brazil or elsewhere—all stressed the fact "Ogopogo", "Cady" or what-have-you, was different! Scientists were interviewed by representatives of the popular press, and in unguarded moments suggested it was a relic of pre-historic times hurried across the ages, in some inconspicuous way, into the 20th century.

It is to be regretted that Scotland should have been visited by one of these unknowns. The hard-headed Scot, on occasions such as the anniversary of Burns, may indeed be prone to vain imaginings and uncanny visions, but in his normal state, he is, essentially, "from Missouri". Loch Lomond, which has induced many poems, taught the fashion. It produced a freak seen from its "bonny banks". But when Loch Ness sought to uphold the dignity of salt-water—that was too much for the practical race north of the Tweed. If the Loch Ness monster was photographed—and strange, indeed, it looked! A scientist subjected the picture to photographic scrutiny—and the mystery was gone. It was, in his opinion, the photograph of the fluke of a killer-whale, too modern an animal, foreseen, to be acclaimed in competition with the million year throwbacks which imagination had created.

Until another wave of freak discoveries hit the pages of our newspapers, then, we must content ourselves with Alley Oop's dinosaur as a constant reminder of things that were before man was endowed with his amazing capacity to wonder.

To Explore Ellesmere Island

Oxford University Expedition Is Leaving England In July
Ernest Shackleton, son of the late Sir Ernest Shackleton, famous Antarctic explorer, is organizing what will be known as the Oxford University Ellesmere Island expedition, which is to leave England in July aboard a chartered Norwegian sealer. The expedition is receiving the practical support of the Canadian government and the Royal Geographical Society.

Exploration and geographical survey of some of the hitherto completely unknown interior of Ellesmere island, about 600 miles off Canada's Arctic coast, is the object of the expedition, which will be led by Dr. Noel Humphreys.

At a public dinner in London the chairman hoped that "The visitors will carry away with them some interesting souvenirs of their presence this evening."

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and often-times the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bringing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Means True Progress

Streamline Train Promises Railroads New Lease Of Life

M. E. Tracy in an article in the New York World-Telegram, says carrying eighty-five passengers together with baggage and express 1,000 miles in thirteen hours and on \$17 worth of fuel is something new. It promises the railroads a new lease of life, capital new enterprise and labor new work. Best of all, it promises the traveling public more for its money.

We have needed something of the sort for five years. With all the experimenting little has occurred to thrill people. By and large they have been forced to fall back on the hope that the best which could be done was to rearrange what they had on hand.

Progress, which should be considered as synonymous with prosperity, is not made of that kind of stuff.

We are not going to find better living conditions, much less happiness, by doing what we have always done in a different way. That is where political remedies fail.

Progress is a matter of invention and achievement.

Take this streamline train, for instance, and what does it imply?

It implies the scrapping of billions in rolling stock, the substitution of cranes for all the abandonment of steam locomotives for Diesel engines, a great consumption of aluminum and a reduced consumption of steel, different operating and mechanical methods, the mobilization of training of new crews and a multitude of other drastic readjustments.

LETTER FROM A MAN OF 90

About His Rheumatism

He asks us to excuse his writing, to do more than that—we congratulate him on being 90. He writes at all at his age, especially as he has been suffering from rheumatism. This is what he says in his letter: "I am 90 years old. I was in bed for six weeks with inflammatory rheumatism. Since that time I have been taking Kruchen Salts, and have not had another attack. But my hands are still somewhat stiff. I take Kruchen Salts every morning before breakfast, and shall continue to do so, because I am sure it has kept me in good shape for three years. Excuse this writing, as I am ninety years old, and use both hands to write."—J. R. G.

Kruchen's dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Then if you keep up the "little daily dose" uric acid will never form again.

An Unusual Hobby

Englishman Has Wonderful Collection Of Match-Box Tops

A nephew of Lord Kitchener of Khartoum, Major P. A. Beckett, of Ye Old Plough Inn, Speen, a Buckinghamshire village, owns the largest collection of match-box tops in the world. He has 22,000 different tops, and they cover every available inch of space on all the walls in three rooms at his home. He has been collecting them for many years, and has travelled almost the world over in search of new designs. He has some of the first match-boxes which came into use, and a history of world progress can be traced in the colorful designs on the match-box covers which form a unique wallpaper at his country inn. A few years ago, ex-King Alfonso, who is also an enthusiastic match-box top collector, paid a visit to Major A. Beckett and spent several hours inspecting his display. But ex-King Alfonso's collection was limited to a mere three thousand!

All the most injurious grasshoppers in Canada shed their skins on an average of five times during the course of their development. The grasshopper's skin does not keep pace with the growth of the insect, so this pest goes through the several processes of moulting by hanging upside down attached by its legs to some support and slowly wriggling out of its old coat.

Ease Pain, Headache in Few Minutes

2 LATER

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The saturation of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly by you swallow it. And that is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. Only when you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross on every tablet of Aspirin.

Trying To Solve Puzzle

Scientists At Chicago Seek Reason Why Midgets Do Not Grow

Why is a midget a midget? Scientists and medical men who have puzzled over this baffling question for years will have an opportunity to pursue their investigation to a fuller extent at the Chicago World's Fair this summer.

Nate T. Eagle, managing director of the new midget city at the fair, has extended an invitation to scientists to use the colony of little people in a "clinic" to study the perplexing problem of why the midgets never grow up.

The midget city will occupy the same location as it did last year but will be four times as large. It will be populated by the largest gathering of midgets of both sexes and all ages ever congregated in one place.

Although the midget's size is believed to be due chiefly to glandular disorders, no one has ever answered the question logically and scientifically.

Australian Poet Honored

Bust Placed In Poet's Corner Of Westminster Abbey

Adam Lindsay Gordon, national poet of Australia, who has been honored by his bust being placed in the Poet's Corner of Westminster Abbey, is the first British Commonwealth poet to be so commemorated, and the first poet so honored since Tennyson, beside whom his bust stands.

A memorial volume by Mayor Douglas Sladen, on whose petition the monument has been erected, has been published, giving the story of Gordon's eventful life, his one love affair, and his tragic death.

Gordon sailed to Australia "in the wild old days" and "became successfully a mounted policeman, a horsebacker and trainer, a member of parliament, and the most famous steeplechase rider Australia has ever known."

He died by his own hand in 1870, burdened with debt, and depressed by the news that he had lost the case for the recovery of his ancestral lands (as head of the Gordons of Hallhead in Aberdeenshire) he went out into the scrub and shot himself. A day after he had published his last book of poems, "Rust Ballads and Galloping Rhymes."

The average cost of producing hay on the Dominion Experimental Farms in the Prairie Provinces has been \$8.42 per acre, or 0.25 per ton for a yield of 1.44 tons per acre. Considerable variation in cost has occurred on different experimental farms, the cost per acre having ranged from \$6.93 at Swift Current to \$11.18 at Morden, while the cost per ton has varied from \$4.47 at Brandon to \$8.42 at Indian Head.

X-Ray Motion Pictures

Newly Perfected Camera Shows Bones In Process Of Knitting

Broken bones are now shown in the process of knitting by x-ray motion pictures which are made by a new camera perfected by Doctor Arthur C. Pillsbury, naturalist and photographer of the University of California. Doctor Pillsbury's camera works on the same principle as the one used to photograph the unfolding of flowers, taking a series of single pictures at intervals, of a movement imperceptible to the human eye, and then running them off as motion pictures to show movements which may have taken several days, all encompassed in a few moments.

The first motion picture made with the x-ray camera showed the growth in the interior of a rose. It took seventy-two hours to film, as only one picture at a time could be made in intermittent exposures.

To avoid damaging the rose during the filming Doctor William D. Coolidge, inventor of the Coolidge tube, designed a special x-ray tube.

British Museum Buys Records
Bible Contains Births Of First Children At Tristan Da Cunha

Bible records of the births of the first children at Tristan da Cunha, the lonely little British island of volcanic origin in the south Atlantic, 2,000 miles west of the Cape of Good Hope, have just been purchased by the trustees of the British Museum.

This Bible, which is an American one, dated 1831, was in the family of William Glass, the English founder of the Tristan settlement. In now faded ink it records Glass' marriage and the birth of his children, from whom many of the 700 islanders today are descended. The latest owner was Mrs. Annie Glass, a granddaughter of William Glass.

"I don't know what to make of the lettuce in my garden," says a correspondent. He had better consult a salad recipe book.

Hang it in your kitchen. Pull out one sheet of Waxed Paper at a time.

Research Laboratories Investigate Possibilities Of Using Wheat For Manufacture Of Fuel Oil

Seeking new uses for Canada's now over-abundant supply of wheat, scientists are investigating the possibility of using 25,000,000 bushels of wheat every year to drive motor cars. After further study of the possibility of using alcohol made from grain as a motor fuel, the national research laboratories have issued a revised report bringing the information available up to date.

If one-tenth of the annual consumption of motor fuel in Canada were replaced by alcohol made from wheat, the report estimates, some 25,000,000 bushels would be needed. A survey shows the use of mixed motor fuels is increasing in Europe and is being seriously considered in the United States.

In a discussion of this possibility the report estimates it would increase the cost of motor fuel by approximately two or three cents a gallon, assuming the use of No. 5 wheat at 60 cents per bushel, Fort William basis.

Engine tests carried out in the national research laboratories with mixtures containing 5, 10 and 15 per cent. alcohol show that alcohol is an excellent anti-knock agent. The 15 per cent. blend gave somewhat more power than gasoline alone, but fuel consumption is higher. It is suggested the use of alcohol might render unnecessary the importation and use of tetra-ethyl lead as an anti-knock compound.

In the near future motor fuel made by the hydrogenation of coal may also be a competitor in the motor fuel market, the report notes. This will be finally demonstrated in the course of a year or two as a result of a plant being built in England under a similar arrangement with the British government.

To Preserve Order

May Pass Legislation In England To Empower Police To Enter Political Meetings

Legislation empowering the police to enter political meetings, when their presence is warranted, in the interests of peace and order will be likely effected at once in the British House of Commons. It is planned to have it ready for application to a scheduled fascist rally at the White City stadium in August.

The government's decision to tighten the present law, which limits police attendance at political meetings unless they are invited or disorders are anticipated, followed a debate in the commons in which Sir John Gilmour, home secretary, informed the government might have to arm itself with further powers to prevent disorders.

Leaders of all parties in the house will be consulted on the new legislation, it was said. Recent clashes between fascists, home secretary, were referred to during the debate.

Offers Good Market

China Imported \$600,000 Of Chewing Gum Last Year

Last year China imported \$600,000 worth of chewing gum. This amount is estimated to total about 70,000,000 strips. The traditional Chinese equivalent of gum is the water-melon seed, of which tons and tons are consumed each year throughout the width and breadth of this vast land. Few Chinese pass a day without cracking a few black dried seeds between their teeth and it is estimated that every Chinese disposes of at least ten seeds a day. If an arbitrary population of 400,000,000 is accepted it will be seen that gum has a long way to go.

Heating The Law

How the law is beaten as told by a Kansas paper: A travelling man says he called the attention of a western Kansas hotel man that it was against the law to use roller towels. "I know it," said the landlord, "but that towel was up before the law was passed and the law is not retroactive. The law has been in the books over 20 years."

W. N. U. 2088

Wheat Is Wealth

No Surplus Of This Commodity Says Henry Ford

There is no wheat surplus in the world today, Henry Ford said in an interview with the "Financial Post." The world could use many times as much wheat as it grows today," he said.

"Wheat is wealth," he continued. "The wheat surplus is a direct challenge to learn more ways in which to use wheat. The trouble is everybody thinks of wheat in terms of money. They raise wheat in order to buy money with it. That is putting the cart before the horse. The wheat is wealth; the money is merely part of the conveyor system which passes the wheat around."

The automobile magnate said there may be a score of uses for wheat waiting for someone to discover. "Yet with all the magic of an unrivaled future in every kernel of wheat we tell farmers that they must grow less of it and we try to raise the price so that people cannot afford to buy it," he declared.

"There never was a crasser notion than the idea that there can be too much of anything," he continued. "There is need right now in the world for all we can produce of every useful commodity."

Canada's Dairy Cattle

Number Is Steadily Increasing States Federal Official

Hector Cullen of the dairy branch of the federal department of agriculture, told a service club at Kentville, Nova Scotia, the number of dairy cattle in Canada is steadily increasing despite Henry Ford's prediction that before long a milk river will replace dairy cows and synthetic milk will be in general use.

People in Canada are using more condensed milk than ever before, he said, noting that the first condensed milk factory in Canada was built in Truro, N.S.

He continued that Canada, in her best years, produced \$280,000,000 worth of dairy products.

A Scientific Feat

Rejuvenation Process For Seeds That Makes For More Rapid Growth

A scientific feat that is almost the equivalent of abolishing winter—a new kind of rejuvenation process for seeds that promises to be of immediate benefit to the farmer—has been accomplished by the United States department of agriculture.

It has found that the longer wavelengths of light, the red, orange and yellow rays, have the almost miraculous power of rousing seeds from their winters dormant state, a sort of living death, and start them growing several months ahead of schedule. This new process of "near resurrection" was discovered and developed by Dr. L. H. Flint.

Justice seldom exceeds the speed limit.

By Ruth Rogers

A DARLING LITTLE FROCK OF FRENCH INSPIRATION FOR DAINTY WEAR GIRLS

Small girls' clothes of good taste, necessarily remain simple, as this cunning French model illustrated.

It's fascinating in blue denim with white dots and blue bias binding trim.

Note the circular cut of the skirt that permits of perfect freedom. It is attached to a brief yoke, front and back.

It's especially easy to launder.

Style No. 587 is designed in sizes 2, 4 and 6 years.

Size 4 requires 1 1/2 yards of 30-inch material with 9 1/2 yards of bias binding or ribbon.

Ballie prints, gingham checks, plaids, organdis, crinkled crepe prints, voile prints, etc., are perfect mediums.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap foil carefully.

Water Shortage In London

City Has Only About Three Months' Supply In Storage

London tube trains and buses are plastered with notices urging economy in the use of water, as no prospect is seen of any material rainfall.

Some anxiety exists in several animal centres where, if the dry weather continues, assistance may be sought from other municipalities.

London itself has about three months' supply in storage.

Tomatoes grow redder if not exposed to the hottest sun.

May Undertake Study Of Barley With Object Of Improving Quality And Finding Markets

Problem Is Nature

How Birds Know Their Special Points Of Beauty

A mysterious problem is presented by the way birds display to best advantage their special points of beauty, for, lacking mirrors, how should they know where their beauty lies?—where are the touches of color, out of sight of their eyes, which are crowning glories? How should a goldfinch know the decorative value of the blaze of crimson on his face? Yet he will force the glory of his blaze on the attention of the hen he is courting, turning his head this way and that, as if to hypnotize her by its brilliance. And it is very sure that he makes the most of the gold bars of his wings, as the chaffinch does of his white epaulettes. The goldfinch dances to display those bars, and the way he stretches his wings, fanwise, with the air of a tailor unrolling a cloth of gold, has earned him the name, "proud tailor." A hundred examples of beauty of which birds seem conscious, though it may be invisible to their own eyes, will crowd to mind. A minor one is presented by that lover of trees, the nuthatch, who will turn himself into a graven and colored image of a bird as he poses on a tree-trunk before a hen, as if to give her the best possible view of his watch-dog and buff tones. To display the buff on his breast he parades before her with stately steps and head pushed forward.

Alberta's Fire Toll

More Casualties Last Year But Less Property Loss

Thirty deaths from fires were the casualty list for Alberta in 1932, according to the report of Fire Commissioner Henry Brace, as made to Hon. R. G. Reid, provincial treasurer, for the calendar year. The number of deaths is considerably in excess of the figure for the preceding year, which was but nine.

There were 1,929 fires during the year, in all parts of the province, and property loss aggregated \$1,435,612 as compared with \$2,495,491 from 1,937 fires in 1932. A reduction in losses for the second year in succession, amounting to more than a million dollars, is regarded as a highly satisfactory feature of the fire situation. It was, moreover, the lowest fire loss on record for the past 14 years.

While the number of fires was only slightly less than the year before, the report points out that "the fires that did occur did not assume the proportions or cause the destruction that was the case in former years."

Eight out of every 10 fires are declared to have been due to carelessness in the handling of fire or neglect in removing fire hazards.

The only notable increase in Sunday school attendance in the world in recent years has been in Africa.

Establishment in Canada of a barley research laboratory and if necessary the importation from Europe of a bio-chemist with special knowledge of maling problems to direct it, was recommended by the grain research committee at its meeting in Ottawa.

C. M. Hamilton, member of the board of grain commissioners, Winnipeg; L. D. Wilgus, director of the commercial intelligence service, department of trade and commerce, Ottawa, and C. B. Davidson, of the agricultural branch, Dominion bureau of statistics, sat in at the meeting. Representatives of the University of Alberta, the University of Saskatchewan, the federal department of agriculture and the National Research Council and laboratories attended as members of the committee.

On the basis of quality, it was agreed, Canadian barley would find markets and it was with scientific research that the required quality would be obtained.

The suggestion was made that Canada should proceed with fundamental studies of barley as she had undertaken fundamental studies of wheat.

It was decided to prepare memoranda for the appropriate authorities on the discussions which had taken place at the meeting on the following: Ways and means of facilitating the distribution of feed grains in the domestic market; ways and means of increasing the cleanliness of coarse grains and the desirability of raising the statutory coarse grain standards; ways and means of assuring that sufficient seed of good quality is available in growing areas.

Farm Crops Production Costs

Keeping Cost Records Has Become Necessary For The Intelligent Farmer

Data on the cost of production, accurately kept for several years and then properly interpreted, make possible a more intelligent selection of crops and throw some light on a better proportion of each crop to grow. Every farmer has his own method, as is evidenced by the story of the farmer whose barn was on fire. His neighbours were helping him, first getting out the stock, and then the implements. Then one of the helpers saw the farmer vainly attempting to wrench off the barn door and asked "What in the world do you want with that old door?" The farmer replied "Well, that door has all my stock in it for the last five years, and I have got to save it." Of other methods used in estimating the cost of producing crops, much valuable information on every phase of cost may be found in the latest bulletins on the subject (No. 159) from the Dominion Bureau of Statistics (Canada) issued by the Dominion Department of Agriculture.

All Have One Defect

Plans To Make Over Society Forged About Human Nature

Elihu Root, one of the foremost American jurists and statesmen of this generation, once said: "All my life people have been coming to me with plans to make over society and its institutions. Many of these plans have seemed to be good. Some have been excellent. All of them had one defect. They have assumed that human nature would be better in a certain way. If it would behave in that way these plans would work, but if human nature would behave in that way these plans would not be necessary, for in that case society and its institutions would reform themselves."—Toronto Mail and Empire.

Everybody Tries It

The human desire to get something for nothing apparently knows no class distinction. Police headquarters revealed the occupants of 58 persons arrested in raids on local headquarters are included eight day laborers, a "gentleman farmer," a journalist, a tailor, six tailors, six travelling salesman, a shoemaker and a negro porter.

ARCHBISHOP OF CANTERBURY ASKS POPE HELP AVERT WAR

In a startling plea to His Holiness Pope Pius XI, to help avert war, the Most Reverend Cosmo Gordon Lang, Archbishop of Canterbury, stressed the peril surrounding world peace. In a speech before a gathering in London, the Archbishop asked the spiritual head of the Roman Catholics to call upon all his churches throughout the world to promote a better spirit of Christianity. In the photos are, left to right: The Archbishop of Canterbury, St. Peter's Cathedral in the Vatican City, and Pope Pius.

WORLD HAPPENINGS BRIEFLY TOLD

Fifty additional constables have been engaged on the Northern Ireland border to cope with cattle smuggling from the Irish Free State.

The Prince of Wales has accepted the presidency of the English-Speaking Union of the British Empire, it was announced in London.

Twelve new warships are to be built for the Polish navy, it was reported at Warsaw. They will be four mine sweepers, three destroyers and six submarines.

What is probably the world's largest modern lathe has just been made at Sheffield for the English Steel Company to admit forgings up to 60 feet in length and 80 inches in diameter.

Once again, the fact that Britain has no intention of handing over Bermuda or any other territory in payment of the war debt to the United States was stated in parliament.

A court-martial found Augustine Waldemar, former premier of Lithuania, guilty of an attempt to overthrow the existing government, June 7. It condemned him to 12 years at hard labor.

Without fuss or ceremony, the bridge across the second narrows of Burrard inlet, connecting Vancouver with the north shore, was re-opened for traffic after being closed nearly four years.

The birth rate in England and Wales was higher during the first four months of this year than in the same period last year, according to vital statistics made public recently. An increase of 906 births was recorded.

Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

Establish Farm Schools

Prince of Wales Donates Sum For Child Emigration Society Plan

The Prince of Wales has donated \$50,000 to the Child Emigration Society's scheme for establishment of farm schools in the Dominion for children from Great Britain, including a farm school in British Columbia.

With the support of the prince the society launched a campaign for \$500,000 to develop the scheme, which has proved very successful in Western Australia. Children remain at the farm schools five or six years.

Employment in Belgium is now above last year's figures.

Sure Signs

of kidney troubles are pain in the back, difficult urination, deposits in urine. GIN PILLS relieve kidney trouble by gently soothing and healing the inflamed tissues. 50c a box at all druggists.

Four Trips Each Year

Air Mail Service For Fond du Lac Post Office

Between 8,000 and 10,000 letters from air mail collectors were carried on the inaugural flight June 15 between Fort Chipewyan and the new post office being opened at Fond du Lac, at the eastern end of Lake Athabasca, according to postal officials at Edmonton.

Information from Ottawa shows that the Canadian Airways, Ltd., which has the mail contract, will make four trips a year between the two offices.

ACTIVE SPORTS AND SPECTATOR SPORTS FROCK

It has a cape that buttons "on". Plan your summer wardrobe now, while you have the choice of all the lovely cotton fabrics. They reign supreme this season.

A gay stripe in pique made the model for today's pattern. Note in the small view the cape you can button "on" for spectator sports or you can even wear it to town.

Other smart cottons are plaids or stripes in peasant waives, shirtings, gabardines, woven seersuckers (that need no ironing), eyelot batistes, etc. Linen, plain tub pastel batistes, shirtings, silks, etc. are other nice mediums.

Style No. 349 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 2 1/2 yards of 36-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

Pattern No. 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

TOWN: 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

Little Journeys In Science

ANAESTHETICS

(By Gordon H. Guest, M.A.)

Acclaimed as "God's greatest mercy brought by man to man", ether was first used in surgical operations nearly 88 years ago. The first demonstration took place in the Massachusetts General hospital at Boston on October 16, 1846, when William T. G. Morton, a young Boston dentist demonstrated that this anaesthetic could be used successfully in the performing of operations.

Although Dr. Morton is credited with giving the first demonstration of the use of this anaesthetic before a group of medical men it is understood that a Dr. C. W. Long, of Jefferson, Georgia, had previously used it to some extent in his practice.

Following Dr. Morton's demonstration, the use of ether was quickly adopted by medical men on this continent and abroad. This new development brought about a great revolution in surgery and did away with the gruesome scenes which had formerly been associated with operations during which the patient did not lose consciousness.

In 1844 Humphrey Davy, the English scientist known throughout the world for his invention of the Davy Safety Lamp, used by miners, and by far the largest over made, it is at present in the shipyard at Clydebank where expert workmen are engaged in assembling the various component parts. When this job is completed and tests carried out to ensure that every detail in the fitting is perfect, the rudder will be dismantled and transported in sections to the liner's berth where it will be re-assembled and fitted on to the ship.

Other tests which have been carried out include those to determine the design and form of the liner, in which over sixty models were used and over four thousand experimental runs carried out in the experimental tank; the wind tunnel experiment in which models of 30 funnels were used to decide the design and shape of the great funnels and to make sure that the decks and ventilators of the ship will be kept clear of funnel gases and the experiment made to ascertain the exact position on the bows of the hawsepiers. For the latter purpose shipwrights erected in the shipyard a perfect replica of the immense bow of Number 534 and with a model of the hawsepiers and another model of the anchors a series of tests were made, perfection in action being finally achieved.

In the series of cabins being constructed ashore for testing purposes everything that goes into a stateroom in all three classes of accommodation will be given a critical try-out. The rooms will be exact replicas of similar rooms which it is intended to build into the ship.

The designers and furnishing experts will fit out the model rooms down to the last detail. Numerous designs in wall decorations, carpets, and other hangings will be tried out; furniture, beds, wardrobes, chairs, etc., will be installed until the experts are satisfied that the decorative and furnishing schemes provide the maximum of comfort and restfulness.

An important feature will be the demonstrations carried out in regard to the heating, lighting and ventilation of the rooms. Scores of these experiments will be made to make certain that the perfect ease and comfort of the passengers will be assured.

These model cabin experiments are another remarkable instance of the meticulous care and attention which is being paid to the construction of this great ship.

Care Of Rubber Belting

Vegetable Castor Oil Will Keep It In Good Condition

A cheap and effective method of keeping a rubber belt in condition and to prevent slippage is to apply 30 to 40 drops of vegetable castor oil once a week on small rubber belt, or about one-fourth to one-half ounce on a main drive belt. Mineral oil of any kind should never be used on rubber belts. Most commercial belt dressings are not suitable for rubber belting and should not be used except on the advice of the belting manufacturer. Rubber belts should be left on the pulleys, day and night, rain or shine.

Wake up your Liver

—Without Calomel

Your liver is a very small organ, but it controls all the poisons and wastes that come out of your body. If it is not working properly, you will feel tired, sluggish, and out of color. You will have a yellowish tint to your skin, and your eyes will be red and watery. You will also have a bitter taste in your mouth, and you will feel a general sense of uneasiness. All these are signs of a liver that is not working properly. You need a liver stimulant.

Our Little Liver Pills will soon bring back the color to your face. They are made of natural herbs, and they are gentle on the stomach. They will also help you to sleep better, and they will give you a general sense of well-being. Try them today. You will see the difference in your color and in your health.

New Super-Cunarder

Surprising Details Of Vessel Now Being Built In Clydebank Shipyard

The enormous size of the funnels to be placed on the new super-Cunarder, now designated as the 534 in the Clydebank shipyard, Glasgow, may be visualized when compared with the various tubes and tunnels in operation in New York City. The giant liner's stacks will be in the neighborhood of 100 feet in circumference. The diameter will be approximately 30 feet. Thus it will be greater than any of the following: Holland Tube, 29 feet 6 inches; Pennsylvania R.R. Tubes, 23 feet; East River Tubes, 23 feet; New York Central Tunnel, 23 feet; Harlem River Tunnel, 15 feet, 9 inches; 60th Street Tunnel, 18 feet.

The forward funnel will be more than 70 feet in height from the keel deck, the two other funnels decreasing in height. From the keel to the top of the forward funnel will be approximately 180 feet, equivalent in height to a building of 15 stories. The first design of the funnels was reached after many demonstrations in a specially constructed wind tunnel. More than 30 model funnels were tested.

A highly important job is taking place in the shipyard in connection with the fitting of the immense rudder. Constructed at Darnlington, this rudder weighs nearly 140 tons and is by far the largest ever made. It is at present in the shipyard at Clydebank where expert workmen are engaged in assembling the various component parts. When this job is completed and tests carried out to ensure that every detail in the fitting is perfect, the rudder will be dismantled and transported in sections to the liner's berth where it will be re-assembled and fitted on to the ship.

Other tests which have been carried out include those to determine the design and form of the liner, in which over sixty models were used and over four thousand experimental runs carried out in the experimental tank; the wind tunnel experiment in which models of 30 funnels were used to decide the design and shape of the great funnels and to make sure that the decks and ventilators of the ship will be kept clear of funnel gases and the experiment made to ascertain the exact position on the bows of the hawsepiers. For the latter purpose shipwrights erected in the shipyard a perfect replica of the immense bow of Number 534 and with a model of the hawsepiers and another model of the anchors a series of tests were made, perfection in action being finally achieved.

In the series of cabins being constructed ashore for testing purposes everything that goes into a stateroom in all three classes of accommodation will be given a critical try-out. The rooms will be exact replicas of similar rooms which it is intended to build into the ship.

The designers and furnishing experts will fit out the model rooms down to the last detail. Numerous designs in wall decorations, carpets, and other hangings will be tried out; furniture, beds, wardrobes, chairs, etc., will be installed until the experts are satisfied that the decorative and furnishing schemes provide the maximum of comfort and restfulness.

An important feature will be the demonstrations carried out in regard to the heating, lighting and ventilation of the rooms. Scores of these experiments will be made to make certain that the perfect ease and comfort of the passengers will be assured.

These model cabin experiments are another remarkable instance of the meticulous care and attention which is being paid to the construction of this great ship.

Is Really Resting

The woman who dances on splendid heels shows is really resting, the West Virginia Osteopathic Society was told. "When a woman puts on high-heeled slippers and goes out to dance she is giving her feet a beneficial rest," said Dr. H. E. Clybourne, of Columbus, O. "The change to high-heeled slippers changes the muscular pull of all the muscles and gives the feet a rest."

SUNDAY SCHOOL LESSON

JULY 1

AHIJAH AND THE DIVIDED KINGDOM

Golden Text: "Pride goeth before destruction, And a haughty spirit before a fall." Proverbs 16:18.

Lesson: 1 Kings 11:26-48:31.

Devotional Reading: Proverbs 1:20-26.

Explanations And Comments

Jeroboam's Rise To Power, 11:26-28. Jeroboam, a young man of the northern tribe of Ephraim, was among the subjects of Solomon engaged in forced labor upon

SORDID DETAILS OF CONDITIONS IN SWEATSHOPS

Ottawa.—Sordid details of sweatshop conditions in eight shoe factories in different parts of Quebec were disclosed to the parliamentary mass buying committee. Investigating auditors said they found many breaches of Quebec minimum wage laws and the evidence probably will be passed on for prosecutions.

The committee ventured up another alley—wages paid in factories supplying goods to department stores. The Quebec shoe manufacturers were selected from advertisements run by different stores but throughout evidence, went unnamed.

Here were the highlights of one plant: It has made substantial profits for four years.

The average weekly wage paid women employees in October, 1933, was \$8.75.

The average for 172 men was \$9.39. Of the 172 men, 126 were married with 401 dependent children.

Eighty-two men received less than \$8 a week.

There were two accidents in one week—one operator lost a finger—from the owner of the factory leaning over the shoulders of his workers, shouting at them to speed up their work.

Fifty per cent. of the men and boys in the plant last October received less than the minimum wage set for inexperienced women. (The Quebec law, like Ontario's, does not touch men.)

One investigator asked a man how he existed on his wages. The reply was that four families lived in one house. The man himself ate one piece of bread for his lunch.

"But how can these people live," asked Sam Factor, L.B., Toronto. "If I were the executive of a department store I certainly would inquire about such terrible wages."

The auditor told of conditions in another plant where 96 per cent. of the employees were paid below the legal minimum. In one department of 55 girls, only two made the minimum wage and boys received \$2.50 and \$3 for a week of 52 hours.

In this factory, 63 per cent. of the men were paid 10 cents an hour or less.

There was an audible gasp in the committee room when the auditor told of work being done in home by adults and children. About \$1.50 would be paid for jobs requiring 10 hours of adult work although it was impossible to say what per centage was done by children.

Another plant, dating back to 1898, discharged women workers who could not earn legal minimums but, on the other hand, paid extremely low wages to men. In the two weeks ending April 28, 1934, the company had 29 men and boys earning less than 10 cents an hour and whose weekly average was \$2.85.

One-half the men in the plant earned less than \$6, the minimum for experienced women. The average for all men, excluding foremen, was \$6.71 a week and for women, \$7.37.

Gold Coinage Disappearing

Premier Bennett Predicts That Gold Redemption Of Currency Will Be Resumed

Ottawa.—Expressing the belief that gold redemption of currency would ultimately be resumed, Premier R. B. Bennett, in the House of Commons, prophesied that gold coinage would disappear.

Gold redemption would be resumed by the nations of the world "since apparently it is the only basis on which we can have any stability," but the redemption would be in bullion, not in coin.

Canadian Cheese Good

Ottawa.—The quality of Canadian cheese in the United Kingdom was so satisfactory that no suggestions were offered by the largest importers as how further improvements could be made, said J. S. Singleton, Dominion dairy commissioner, on his return from London and Liverpool.

W. M. U. 2062

Bumped By Sea Monster

Crew Of Schooner Has Exciting Experience Off Nova Scotia Coast. Yarmouth, N.S.—A night of terror aboard the auxiliary schooner Marjorie E. was described here by fishermen who declared a monster of the sea had almost lifted their vessel out of the water off the Nova Scotia coast.

"It happened Sunday night," related one of the crew. "The night was clear and all of us except the watch were in our bunks."

"Suddenly there was a thundering crash that threw three men from their bunks to the floor. One of them shouted 'We've been rammed—let's get out on deck.'"

"Out we scrambled to the moonlit deck and we were amazed to see in the swirling water the huge form of what appeared to be a whale."

"In frisking about the thing probably had risen directly beneath the ship and the force of the impact lifted her almost clear of the water, allowing it to plunge back with terrific force."

"We didn't know what to do, but we started our engines full speed ahead and left the scene in a hurry, you can bet!"

Japan Keeps Plans Secret

No Information Given Out Regarding 1935 Naval Conference

London.—The Japanese have erected a diplomatic fence of secrecy around their plans for the 1935 naval conference despite assurances of the fairest treatment by representatives of Great Britain and the United States.

Tsuneko Matsudaira, Japanese ambassador, declined to tell Norman H. Davis, American representative in preliminary bilateral discussions what are the present proposals and hopes of the Tokyo government.

After Davis had given Matsudaira an unreserved promise that there will be no sort of Anglo-American understanding against Japan, he questioned the Japanese ambassador regarding his nation's plans.

Deal With Sweepstakes

Informers May Be Unable To Collect Cash In Legislation Challenged

Ottawa.—This provision of the criminal code which makes it possible for an informer to sue and obtain the proceeds of a lottery will disappear if the amendment introduced by Hon. Hugh Guthrie, minister of justice, passes the House of Commons. The bill received first reading without discussion. Instead of the informer being able to obtain the proceeds, the measure provides that they shall be forfeited to the crown. The amendment does not apply to small raffles and church bazaars in which the amount involved is less than \$50.

Second Action Against Rodeo

Tex Austin Is Having His Troubles In England

London.—Troubles continued to pile up for Tex Austin, promoter of "the world's gentlest rodeo."

Already accused of terrifying a steer in violation of laws against cruelty to animals, Austin was notified of a new action against him because he staged a charity performance of his gentlest rodeo Sunday.

The new action was instituted by the Lord's Day Observance Society, which seeks to collect \$500 from Austin and \$1,000 from the National Sporting Club.

United States Buying Silver

Washington.—United States government has extended its new monetary policy into another field with the signature of President Roosevelt of the Pittman silver purchase bill. The measure directs buying of the metal by the treasury until it comprises 25 per cent. of the nation's metallic monetary stock.

Canadian Printing

Ottawa.—The Canadian printing trade employs 32,564 men and women, says the Dominion Bureau of Statistics, and produced \$101,492,333 in 1932, \$86,312,989 representing daily newspaper output.

WINS IN SASKATCHEWAN

JAMES G. GARDINER
Liberal leader of Saskatchewan, who was returned to power by a sweeping majority.

Saskatchewan Elections

Liberals Returned To Power By A Most Decisive Endorsement

Regina.—The Liberal party under the leadership of James G. Gardiner, were swept back into power in the Saskatchewan elections in a most emphatic manner. With the election of five of six Farmer-Labor candidates, the C.C.F. party will form the only opposition. Not a single Government supporter was elected.

In an interview, Premier-elect Gardiner said the legislature would be assembled as soon as possible. There may be a special session to repeal the School Legislation Act passed by the now-extinct Anderson government.

"This legislation, which would automatically come into effect August 1, would place educational matters in the hands of a commission, and 'take education out of politics'—as Premier Anderson contended. But it was diametrically opposed to the Liberal policy, said Mr. Gardiner, and he was looking into the legal aspects of the legislation to see if a special session would be necessary to preclude its going into effect."

The campaign had been cleanly fought. The issues were clear and the policy of the Liberal party to enforce economy in administration, effect reconstruction and to improve the trade relations of the Dominion with other countries had been clearly approved.

Better Feeling Towards Canada

Vancouver.—Better feeling towards Canada and Canadian products is towards the Japanese. The bill received first reading without discussion. Instead of the informer being able to obtain the proceeds, the measure provides that they shall be forfeited to the crown. The amendment does not apply to small raffles and church bazaars in which the amount involved is less than \$50.

Across Atlantic In Yacht

Lone Adventurer Makes Perilous Trip From Ireland

St. John's, Nfld.—A lone adventurer from Great Britain sailed his tiny yacht into harbor after crossing the Atlantic and then tumbled gratefully into bed for his first real sleep in 24 days.

Commander R. B. Graham, R.N., was skipper and crew of the 24-foot yawl on the perilous crossing from Bantry, Ireland. He left there 24 days ago, and though heavy weather buffeted his little boat at times, made a remarkably fast crossing.

To hear Commander Graham speak sailing across the Atlantic single-handed might be an every-day happening. "Yes," he said, "we had some varied weather, but the boat behaved splendidly."

Nothing worried him on the long trip, he said—except lack of sleep. At night he would turn in after setting a course and lashing the yawl's helm, but his sleep would be interrupted from time to time.

Crop Situation Improves

Dominion Bureau Of Statistics Issues Report For West

Ottawa.—Cereal crops in the prairie provinces were adjusting themselves to the complete change in weather conditions which occurred during the first week in June, and which had continued since that time, stated a crop report issued by the Dominion bureau of statistics.

In some areas, notably the southern portions of the three provinces, drought, wind and grasshoppers have taken a toll of the crop and even the favorable weather so far experienced in June will not offset damage. In these areas, however, a noticeable improvement has taken place. Grasshoppers have been generally inactive. Crops in northern areas of the three provinces have made steady progress during the past week.

Manitoba prospects range from fair to good except in southern districts, where adverse weather conditions caused serious damage.

British Tariffs Attacked

Rome.—German and Italian delegates to an international wool conference here attacked British Empire tariff preferences and threatened to curtail imports from such wool producing countries as refused to accept German industrial exports while giving preferences to those of other countries.

No Answer From Thomas

London.—J. H. Thomas, secretary for Dominions, declined to answer in the House of Commons when a questioner asked if the British government was prepared to "bring pressure" on the Canadian government to implement the Ottawa agreement in respect of the Canadian tariff board.

SPECIAL STAMP COMMEMORATES DISCOVERY OF CANADA

Here is a reproduction of the special stamp to be issued by the Post Office to commemorate the 400th anniversary of the discovery of Canada by Jacques Cartier. The stamp is to be released on July 2nd.

HEPBURN TO TAKE OVER REINS OF OFFICE ON JULY 10

Toronto.—Mitchell F. Hepburn, the youngest man to ever gain the premiership of old Ontario, arrived here to build up a Liberal cabinet to take over the reins of government back in the grasp of the party after a lapse of 29 years.

As the 37-year-old Liberal leader, "tired but happy," rested at his home near St. Thomas after a strenuous campaign climaxed with a smashing victory, discussion of the overwhelming downfall of Conservative representatives turned to eager speculation as to the next steps.

It appeared the new regime, the first Liberal administration since 1905, would sit in the office for three weeks, or until about July 10. Premier George S. Henry and his ministers, most of them defeated, will clean up their desks before tendering their resignations to the lieutenant-governor. Mr. Hepburn will complete his cabinet and forward the initial program before taking over.

Date of the advent of beer by the legislature to deal with unemployment and relief, as promised by Mr. Hepburn; the fate of heads of 28 boards and commissions which are to be revised, and like questions occupied the minds of the electorate after their record-breaking turnout.

Aftermath of the Liberal avalanche which swept Conservatives out of every seat west and north of Toronto and the six of Tory Toronto's 13 ridings, were suggestions of recounts in a few seats where the vote was close, and a few unofficial pleas to Conservative headquarters for consideration of a convention to choose a new leader and revise the platform.

Much Depends On Weather

Mild Warm Days Will Greatly Lessen Grasshopper Menace

Saskatoon.—Water-dripping early maturity of grasshoppers in Saskatchewan this year may save the crop from late damage by the flying hoppers, in the opinion of K. M. King, in charge of the Dominion entomological laboratory here. If warm moist weather prevails, the mature hoppers quickly become infested with a disease which carries them off rapidly and the early development this year has pushed forward the mature age of the grasshopper into Saskatchewan's rainy season. Much depends on the weather. Given warmth and moisture the damage to crops by grasshoppers after the flying stage is reached may be much less than last year.

Public Works Program

Federal Government Plans Expenditure Of Forty Million Dollars

Ottawa.—The House of Commons has before it the government's public works construction program involving an expenditure of some \$40,000,000 on building operations authorized over the whole Dominion. It is intended to provide employment and stimulate business and industrial recovery. With little discussion the house passed the resolution preliminary to the introduction of the bill to provide for the construction program and gave first reading to the bill.

Bank Bill Approved

Ottawa.—The senate banking and commerce committee passed with two exceptions, the first 87 sections of the banking bill passed by the House of Commons, June 11. Section 53 dealing with annual and special statements of the chartered banks, and section 75, dealing with the business and powers of the banks, were held over for further consideration.

Silver Export Higher

Ottawa.—Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

Stony Plain Sun.

Published Every Thursday at The Sun Office, Stony Plain.

Thursday, June 28, 1934.

Edmonton Beach.

The grand opening at this popular resort occurs on Sat. Evg. next the 30th. with a dance at which Martin's Orchestra will play.

On Sunday, along with the other regular sports, there will be a vote for your favorite club, culminating with a bonfire at night.

On Monday, the holiday, a very lengthy series of attractions have been arranged. This promises to be a record day here, what with the champion ball match for the Barrie Cup, and the other sports attractions on the bill. There's to be a dance in the afternoon; a \$225 lot will be drawn for, as well as a thousand feet of lumber; children will have free candy.

Martins are to provide music for the big novelty dance which starts at 9 p.m.

Stony Plain and District

A party consisting of Henry Miller Sr., Hy Miller Jr., Walter Miller and Alvin Michels spent the week end at Jasper Park.

While arranging a lengthy trip to Vancouver, Mr. Edw. Hoffman last week took a preliminary center in his motor car to Westlock.

Donald MacLeod, M.L.A., was renewing acquaintances with friends in Stony on Saturday.

After spending a 2 weeks' vacation with friends here, H. Miller and Alvin Michels left yesterday for their home in Detroit.

Butter and Eggs WANTED at The Royal Cafe.

An Old Country Visitor.

The Sunman had as a visitor the other day Dr. Luthard Freiherr von Hohenberg, from Hamburg. The Doctor is a director of the Norddeutscher Lloyd Steamship Co. He has, since coming to America early in the Spring, made an extended trip thru the States and Canada. On his way to Alberta he toured Saskatchewan. The Doctor remarked that, all thru his extended trip, he had not observed such wonderful crops as those in Edmonton district, and particularly those in Stony Plain district.

The Baron was accompanied by Herr S. R. Tanner, the district passenger agent in Edmonton for the N.D.L. and Hamburg American Line. Mr. Tanner predicts there will be a very large tourist traffic this season to the Old Land over the two steamship lines he represents.

Mr. Paul Werner, the agent here for the N.D.L., was with the party.

Dancing to Good Music.

Kelly's Hall barely held the goodly crowd of dancers which gathered there Friday evening, to trip the light fantastic to the music supplied by the Elks' Orchestra from Edmonton. The localities turned out, and their ranks were added to by a good-sized delegation from the City which followed their favorite musicians to Stony Plain. Kelly's Hall should see another record crowd on the floor the Evg. of Monday next July 2d.

Tractor Races

To be Featured at Western Fair Next Month.

Visitors to the Western Fair and Exhibitions next month will have the unique experience of seeing farm tractors streak around the race track at mile-a-minute speeds. One of these tractors—the famous Allis-Chalmers No. 900, which holds the world's speed record for tractors, will be driven by Louis Meyer, famous racing driver, who will use the new low pressure Pistone Farm Tractor Tires. Meyer is the only man who has ever won three A.A.A. Championships and is one of the pair who have twice won the Indianapolis Speedway Race. Since their introduction several years ago, pneumatic tires for tractors have met with great success. All equipment manufacturers have adopted them and tests show that tractors with these tires are able to do 27 p. c. more work with 24 p. c. savings in fuel while the tractor life is extended 33 p. c. and repairs reduced by 50 p. c.

The Mail Schedule.

From the East and to West—Tues. Thurs. and Sat. at 10:37 P.M.

From the West and to East—Mon. Thurs. and Sat. at 4:51 a.m. Mail for East will also be dispatched to west bound train and transferred east at Jasper.

Mail for dispatch to both East and West should be posted before 10 P.M.

Reg. dispatched and received with every mail.

Stony Plain Sports Day, July the 2th.

CROP TESTING

The New Plan—
The wheat fields of 50,000 farmers are being tested at 500 points in Western Canada.

Watch this phenomenon for days of hot days. Plan to attend and see the valuable demonstration.

Fourteen thousand eight hundred and forty-three happy holidaymakers can't be wrong, or so the Canadian Pacific Steamships expect to prove this summer with four short sea cruises by the Duchess of Richmond between Montreal and New York.

During the last three summers two Duchess liners have made between them eleven of the nine day trips, the popularity of which has been shown by the fact that 14,443 passengers were carried on these vacation cruises.

The Duchess of Richmond's cruise departure from Montreal will be on July 21, July 21, August 10 and August 20, and from Quebec the evening of the same day. Sixteen hours will be spent in New York on July 23, August 4, August 14 and August 24, with return to Montreal on July 26, August 9, August 19 and August 29. The day prior to arrival in Montreal eight hours will be spent in Quebec, with opportunities and facilities provided for exploration of the Ancient Capital and surrounding districts such as the Côte de Beaupré, with its famous shrine of St. Anne. Sightseeing trips in New York will also be arranged for those who wish to take them.

All the "triumphs" such as characterizes a lengthier cruise have been planned for the Duchess of Richmond's nine day cruises, and each day of the trip down the majestic St. Lawrence and around the scenic coasts of Nova Scotia and New England will be a complete experience in itself.

Facilities for enjoyment, both in exercise and relaxation, include an open-air swimming-pool, a gymnasium, deck-tennis, horse-racing, shuffleboard and many other sports, and also the opportunity for lazy day-dreaming, for which no better medium can be found than a comfortable deck-chair on a long sunny afternoon.

William Webber, who has directed all previous "Duchess" cruises to New York, will again be cruise director, and all manner of entertainment and organized enjoyment for the cruise members will be provided under his direction and that of the Staff-Captain and the Directors of Entertainment. In command will be Captain Arthur Schwelb, for several years commander of the Montcalm and recently appointed to the Duchess of Richmond.

BYLAW No. 10.

The Council of the Municipal District
of Inga No. 520, duly assembled,
enacts as follows:

1—Any person committing a
breach of any of the provisions of
any of the Bylaws of the Municipal
District of Inga No. 520, now in
force, or which may hereafter come
into force, shall on summary conviction
thereof before a Police Magistrate
or Justice of the Peace, forfeit
and pay (except where other
provision is specifically made therefor)
a penalty not exceeding \$100.00
in addition to the costs of the conviction
for each offence.

2—In default of immediate payment
of any fine or penalty herein
provided or specifically provided in
any other bylaw or any penalty and
license fee, where provision therefor
is specifically made, and of the costs
of conviction or of such penalty,
license fee or costs, as the case may
be, imposed by the convicting Justice,
the same shall be recovered
and enforced as by bylaw provided.
DONE AND PASSED in Council
this 23rd day of May, 1934.

Testified to be a true copy of Bylaw
No. 10.

Signed, R. C. HOWAT, Reeve,
Signed, JOSEPH BEATT, Sec. Treas.

Schedule of Sports.

Following are some of the contests for Stony's Sports Day, July 2nd:

Baseball, 7 teams, 1st prize \$15, 2d \$10; 1st home run or best hit, \$2 Ripped shirt donated by Cash Store.

Basketball 1st prize \$10
Tug-of-war, 1st prize \$5
Best appearing team horses \$5
Best pulling team of horses \$5

United Church Services.

A suitable Patriotic Service to celebrate the first of July will be held in Holborn Community Hall next Sunday at 2.30 p. m. A special program has been prepared, and a large attendance is expected.

During the month of July, beginning next Sunday, the congregation of the United Church of Stony Plain will unite with the congregation at Spruce Grove for worship. The hour of worship at Spruce Grove will be 11.30 a. m. During the month of August Spruce Grove congregation will worship with Stony Plain every Sunday morning at 10 o'clock. There will be no service at Stony Plain during July.

No Talkie Here This Evening

Romano Novaro was seen in films here for the first time at Kelly's Hall on Thursday evening. The vehicle was "The Barbarian," which proved a source of great delight to the assembled audience. The scenes were very realistic, and received high commendation.

Mr Goodman will not be showing his regular picture here on the evening of the 28th, owing to the picture "Two Hearts in Waltz Time" being billed for Kelly's Hall the afternoon and evening of Saturday June 30.

The P. S. Washburn Case.

An involved will case, was heard by Mr. Justice Ewing in supreme court on Friday as two contending parties sought a judicial decision on the will of Philander Smith Washburn, old-timer of Alberta.

The plaintiffs are Pearl Halburton and Bessie Frank Atkins, step-daughters of Washburn, and the defendants are W. M. Washburn and Peter Ewen, executors of the Washburn estate; W. M. Washburn, P. H. Washburn, W. R. Washburn and T. G. Washburn. The estate consists of farm property in Ings district.

According to the two plaintiffs they are the daughters Frank Strong, who died intestate at age of 20 in 1917, and Margaret Strong, the widow, and mother of the two plaintiffs, to married in 1922. P. S. Washburn, whose estate was the focus of the present action. From the estate of her first husband Mr. Strong-Washburn advanced her second husband substantial sums of money from time to time. She died intestate in January, 1931.

It is alleged that Washburn agreed to protect the daughters' interests by willing to them \$500 each and half of the balance of the estate, and such a will was drawn up. Later, however, before his death in February, 1933, Washburn drew up another will and codicil altering the earlier will. It was asked that the provisions of the earlier will be carried out.

On Saturday Mr Justice Ewing handed down judgment in favor of Pearl Halburton and Bessie Frank Atkins.

WEIGH THE VALUE

Make THESE TESTS yourself

SLAM THE DOOR!
No weak, tinny rattle when you close the doors of a new Chevrolet!

FOUND THE BODY!
Fisher puts in more materials... therefore, no shudder or shiver under the blow!

TEST THE ROOF!
You'll find a firm, solid, strong, bow-and-arch structure... no flimsy wire netting!

TRY THE RIDE!
A smooth, steady, level glide... thanks to Kneecaps and extra, balanced weight!

Delivered, fully equipped at factory. Includes tax, license and delivery on the GMAC plan.

Chevrolet's Extra Weight means Extra Value... More Comfort... Greater Safety... Longer Car Life

HERE'S something important to remember:

Chevrolet gives you more weight than any other car in its class. More pounds of rugged, high quality materials in the Fisher Bodies, because Chevrolet doesn't skimp on comfort or safety! More pounds in the husky, solidly-built Chevrolet chassis, to safeguard dependability! And, best of all, you get these advantages of simple weight without any sacrifice of economy. Because, while it's a bigger, heavier car—faster and more powerful—Chevrolet uses less gasoline than ever! Drive the new Chevrolet and you'll never be satisfied with any other low-priced car!

CHEVROLET

SOMMERFIELD & MAYER, STONY PLAIN, Alberta.

The Sun's Calendar.

JUNE—
29—Picnic at Lucknow School.
30—Barn Dance, Edmonton Beach.

2—Sports Day at Stony Plain.
2—Dance, Kelly's Hall.
2—Blue Lake Community Picnic.
4—Celebration at Holborn.
5—Movie Picture, Moose Hall.
6—Hansen Community Picnic.

Hansen's Corners.

The gold diggers at the river are working steady at the present time—the good price for gold making the miners work overtime.

Road work is now in progress at the Corners, with Mr J Kotcheporoff on road boss.

Later on, it is the intention to have a meeting head of ratepayers in this district, in an effort to have all taxes worked out.

The dance on Friday Eve. in Community Hall was a huge success. The affair was put on by the Ball Club of Hansen Corners.

Residents here heard with regret of the death of Cliff Mitchell at Preston, B.C. The remains were interred there, his brother Harry going out for the occasion.

Holborn News.

On Wed. July 4th, residents of Holborn plan to celebrate the 10th anniversary of the opening of the Hall. Under auspices of U.F.A., a program of sports is being arranged for the afternoon, to be followed by dancing at night: small admission charge for dance. Everybody welcome. Lunches, supper and refreshments served.

1934 PRICE OF TOBACCO.

Imperial Tobacco Co. of Canada Limited Signs Tobacco Growers' Agreement.

Montreal, Que. June 29.—Gray M.P. President of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario flue cured tobacco growers are now practically secured for 1934 a price based on 27 cents per lb. for an average crop. Although we are still without any assurance that our manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 21 cent average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

Base Ball Games.

Inga Corner's Central Nine defeated the S. P. Walther Leaguers on the 30th on the Stony diamond by a score of 8 to 6. Ph. Enders pitched for the Inguins when the visitors made their eighth run. Then Johnny Bledarwicks took the mound for the remaining inning and left Central without a hit or run. Ralph Whetterspoon and Joe Kulak pitched and Ph. Smier caught for Central. Ed Mayer caught for the W-L's.

At the Stony diamond on Sunday last, the Walther League squad beat the team from Holborn by a score of 9 to 6. Visitors were leading until the last half of the ninth frame when the locals went up for their final bat. Stony then got three runs through errors on the part of Holborn, Kimberley and Coombs pitched and Ph. Smier caught for the visitors, while Bledarwicks and Ed. Enders pitched and Ed Mayer and Staub caught for W-L's. Tony Darnum umpired.
